**SECRET**

- c. Accession Lists Published 5
- d. Summaries Published 3
- Summary No. 1 "Mineral Resources of Sinkiang"  
Industrial Card File "Ordnance" (3,936 cards)  
Industrial Card File "Railroads" (9,844 cards)
- e. Documents Loaned 120
- f. Sacks of Documents Received 24
- g. Total Documents Scanned 21,068
- h. Documents Re-screened (for International Military Tribunal) 60,000
- i. Documents for Library of Congress 16,737
- j. Personnel on Duty with Documents Branch 83

Recruitment of personnel for Documents Branch is very slow. At present the personnel freeze makes it necessary to justify the hiring of each applicant, subject to approval by the Executive Director for P&A.

III. Projects Contemplated Within the Near Future.

a. Expansion of Documents Branch Operations

On 30 June 1947, the responsibilities of the German Documents Section and of the Special Documents Section will be responsibilities of Documents Branch in addition to the current processing of captured Japanese Documents. The immediate problems of Documents Branch arise from this integration and from compliance with the authority to expand operations to include the abstracting of current foreign periodicals, exclusive of the daily press.

b. Establishment of Document Source Survey Division

Documents Branch is presently surveying world-wide sources of foreign documents to determine existence and availability of those of actual or potential intelligence value. The Documents Source Survey Division will prepare periodically for publication a review of those documents of intelligence value.

c. Periodical Exploitation

Periodical abstracts will be provided in the near future on the following:

Current USSR Scientific and Technical journals.  
Japanese Journal of the Electrochemical Society.  
Japanese Journal of the Electrical Engineering Society.  
Japanese Journal of Microbiology and Pathology.  
Japanese Journal of Physical Chemistry.

25X1A

for/ J. J. BAGNALL  
Chief,  
Documents Branch
